DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dalton et al (US 2003/0004140 or 10/024,018; 1/2/03), Rapaport (US 5049372; 9/17/91) and Altaba et al (US 2005/0130922; 6/16/05 or 10/927,951). Dalton teaches a method of treating cancer (a disease associated with bone metastasis) comprising administering to a patient an effective amount bisphosphonate to disrupt cancer cell adhesion in vivo thereby enhancing the efficacy of chemotherapeutic (doxorubicin) and/or radiation treatments. Note that doxorubicin is the targeting agent. See abstract, paragraph 29, claims 1-11. Dalton does not teach the method comprising an adenosine compound and adenosine receptor blocker such as deoxycoformycin. However, Rapaport teaches a method of treating cancer (a disease associated with bone metastasis) comprising administering to a patient an effective amount adenosine monophosphate (see abstract, claim 1), and Altaba teaches a method of treating cancer (disease associated with bone metastasis) comprising administering to a patient an effective amount deoxycoformycin (see abstract, paragraph 185). It would have been obvious to one having ordinary skill in the art to modify the method of Dalton to include the AMP taught by Rapaport and the deoxycoformycin taught by Altaba. One would have been

Application/Control Number: 10/687,102 Page 3

Art Unit: 1616

motivated to do this since all art methods cited are to the treatment of cancer which is a disease associated with bone metastasis.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton N. Pryor whose telephone number is 571-272-0621. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Kunz can be reached on 571-272-0887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
